10in GARDEN MUMS

All mums are grown to bloom naturally.

Each mum is under a colour heading listed earliest to latest bloom time.

number to the right is the bloom week date according to breeder

Blooming times for 4.5" and 6" mums will be at least 7-10 days later than blooming times of the same variety in larger pots grown outside.

We will not 'hold' mums past their bloom date so do not order a early variety for shipping late September.
